 Columbus, OH

SUMMARY

Mid-level UI/UX Designer/Developer with 10+ years' experience who relishes solving unique challenging problems with a focus on the user's experience from concept to launch. Skilled in wireframing, prototyping, and responsive design, with an understanding of design systems, accessibility, and front-end technologies (HTML, CSS, JavaScript). Passionate about design thinking, continuous iteration, and creating seamless user journeys.

EXPERIENCE

UI/UX Designer

Corporate Tools

 03/2024 - 10/2025

 Spokane, WA

Remote

- Turned complex accounting workflows into intuitive software.
- Contributed to the implementation of new User Experience design standards.
- Worked remotely with the company's software team, building responsive, semantic, and accessible HTML layouts with CSS styling in Vue.js.
- Designed layouts and mockups in Figma for multi-paged web applications (Manual Check Queue, Checkout Flow, complete UI Client portal redesign, and the Admin Portal upgrade).
- Led user experience presentations with project stakeholders.
- Collaborated closely with developers to integrate UI designs into functional applications.

UI/UX Designer/Developer

ARCOS

 11/2019 - 01/2024

 Columbus, OH

Hybrid

- Made decisions on implementing new user experience design standards.
- Developed production-quality front-end software for web and mobile applications using agile practices with Angular, TypeScript, JavaScript, and npm, creating reusable and scalable components for multiple company products.
- Worked remotely for the company's engineering team, building responsive, semantic, and accessible HTML layouts with CSS styling.
- Designed layouts and mockups in XD and Figma for multipage web applications.
- Led user experience presentations with Adobe XD, Figma, and Lucidchart before implementing UIs as extensible code.
- Coordinated with teammates in engineering, product, quality assurance, and professional services through Bitbucket, Jira, Slack, Microsoft Teams, and Google Workspace.

Creative Technologist

Nationwide Insurance

 03/2018 - 09/2019

 Columbus, OH

Consultant for TEKsystems

- Built responsive HTML/CSS pages for multiple applications using HTML, SASS, Bootstrap, and GitHub. (Care Matters Quick Quote, Client Kit Builder application, contributed to the digital design system, Product Pages - Mutual Funds, Annuity Pending, ETFs, etc.)
- Communicated with full stack developers on HTML, CSS, and accessibility best practices.
- Collaborated with UX team leads on research, design, and development decisions and deliverables.

JavaScript Application Developer

InSource Pro

 05/2016 - 08/2017

 Columbus, OH

Independent Contractor for KE Web Development LLC

- Designed and built web/software applications using Photoshop, JavaScript, and ACE framework.
- Troubleshoot and debugged software/websites with quality assurance.
- Organized junior developers' tasks and schedules, while mentoring on ACE framework.

STRENGTHS

Initiative

Implemented new UX design standards and reusable web components across platforms, increasing consistency.

Problem-solving

Proactive approach to identifying user pain points and delivering innovative design and development solutions. Known for balancing user needs with technical constraints to create seamless, efficient digital experiences.

Prototyping

Skilled in transforming concepts into tangible prototypes that accelerate design validation and user testing.

Communication skills

Proven ability to collaborate across cross-functional teams, turning complex requirements into clean, engaging interfaces that drive user satisfaction and business results.

INDUSTRY EXPERTISE
